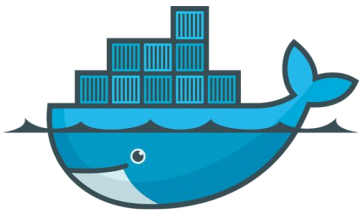
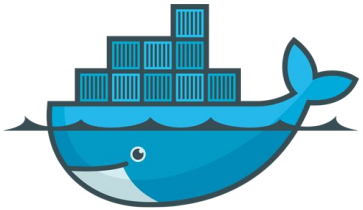
Docker Use Cases on Raspberry Pi

課程大綱

1. 容器與 Raspberry Pi
2. Qemu & Docker
3. Autobuild ARM image
4. MQTT & Docker on RPi
5. Docker Compose for IoT MQTT
6. Send MQTT to Adafruit IO
7. 結語



1. 容器與 Raspberry Pi



Why RPi + Docker

1st credit card-sized PC

HW/SW split….

Rapidly develop IoT Apps

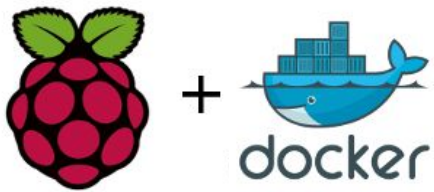
Portable WYSIWYR

ARM is Rising!!!

Docker on Raspbian

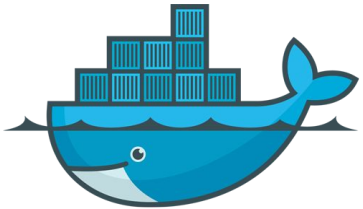
https://www.raspberrypi.org/blog/docker-comes-to-raspberry-pi/
https://docs.docker.com/engine/installation/linux/docker-ce/debian/

curl -sSL https://get.docker.com/ | sh



cti 中天新聞
25美元電腦
再掀電腦DIY風潮
6月29日 週六
熱血科技青年拿到電腦
23:16:20
得5連勝，本季安打數達80太平洋聯盟排名第6，

2. Qemu & Docker



QEMU

Cross platfrom - X86, ARM, MIPS, SPARC…

Trick, Dirty, Boring, High learning curve

Scaleway ARM VPS 

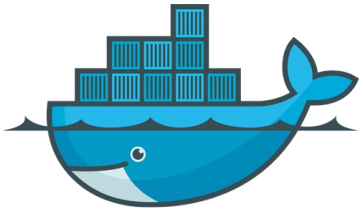
docker run -it -v /usr/bin/qemu-arm-static:/usr/bin/qemu-arm-static philipz/rpi-raspbian bash

Uniform Development by Docker & QEMU

Creating ARM image on X86

1. docker run & apt install
2. docker commit
3. docker push or save/load
4. docker run on RPi

3. Autobuild ARM image



Docker Autobuild

Public Docker Hub

Private Docker Registry, Distribution

Building ARM containers on any x86 machine, even DockerHub

GitHub source code

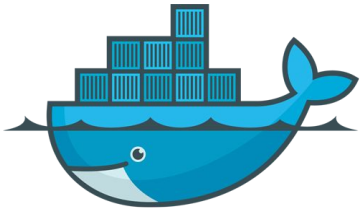
4. MQTT & Docker on RPi



MQTT

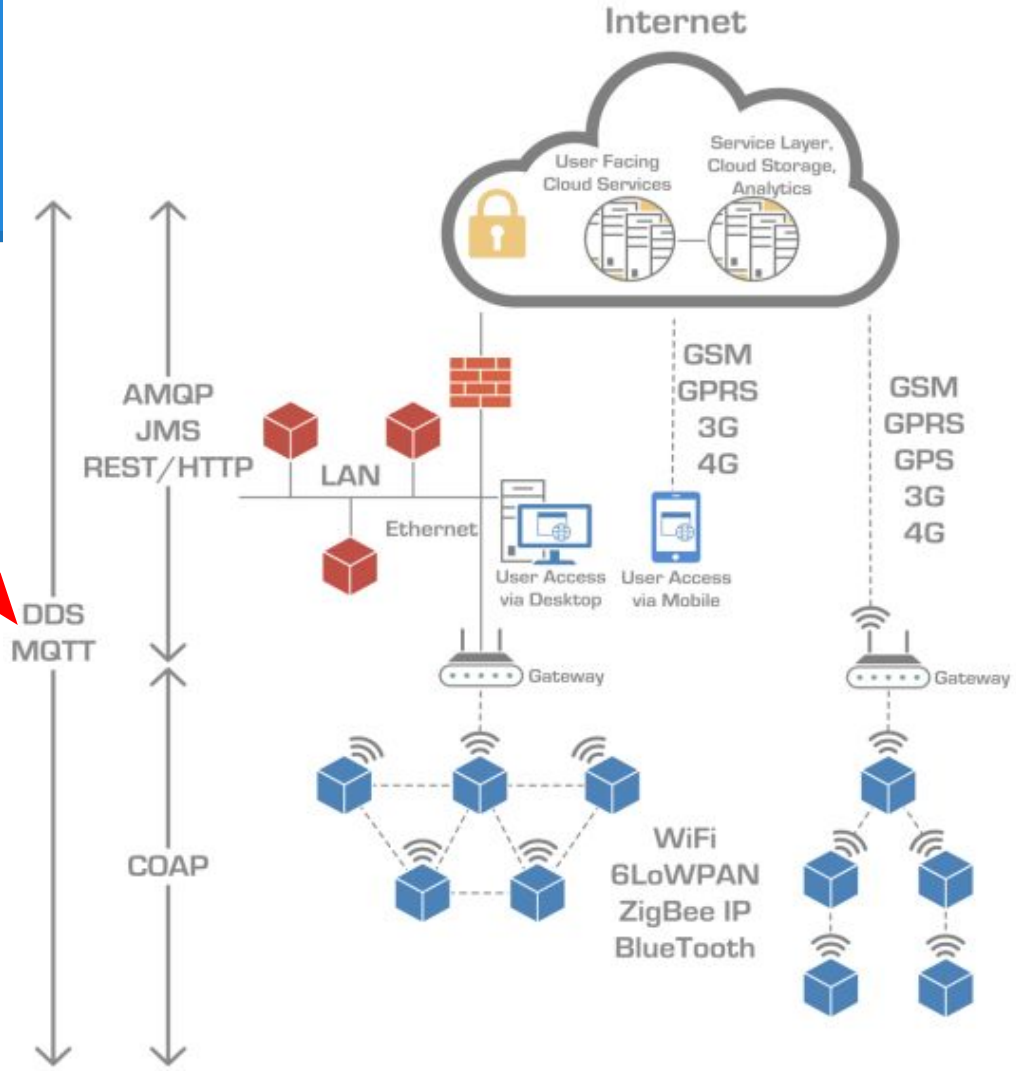
From IBM

IoT Protocol

Pub/Sub, QoS

Arduino, mbed

Mosquitto, Xively

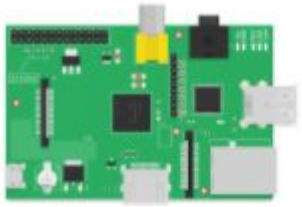


MQTT PubSub Prototype

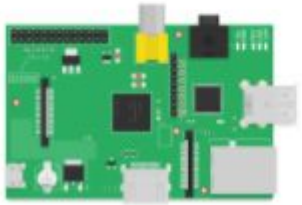
MQTT Pub

MQTT Sub

MQTT Gateway



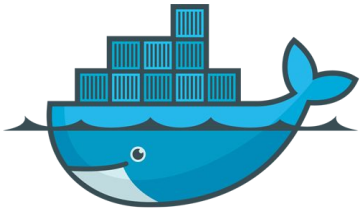
MQTT Pub



MQTT Sub

MQTT Gateway

5. Docker Compose for IoT MQTT

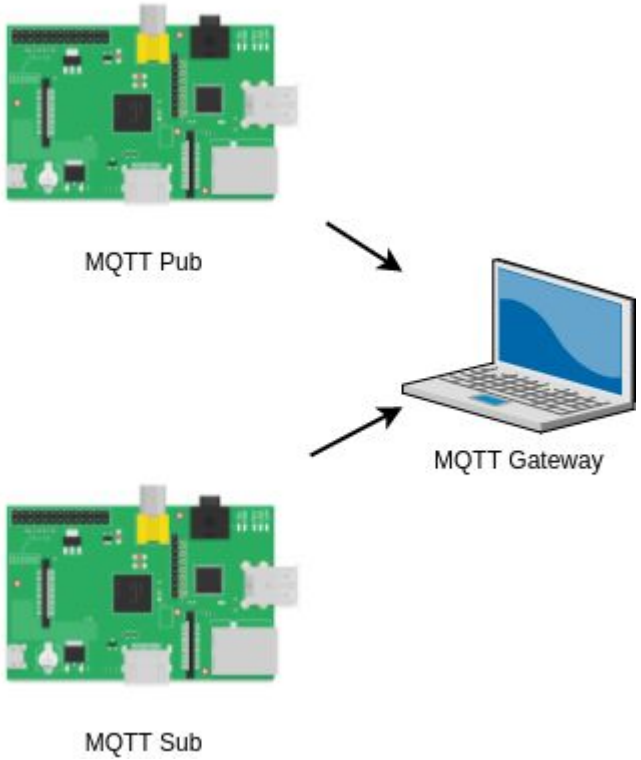


Only One Command

docker-compose.yml

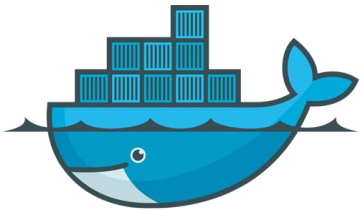
&

docker-compose up



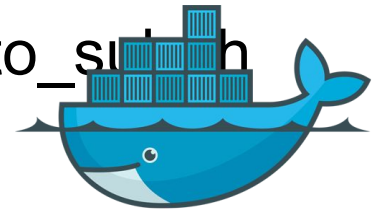
Compose File Sample (1/3)

```
version: "2"
services:
  broker:
    container_name: broker
    image: philipz/mosquitto
    networks:
      - mqtt
    ports:
      - "1883:1883"
```



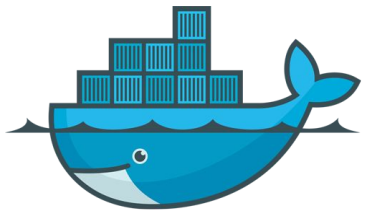
Compose File Sample (2/3)

```
  Sub:
    depends_on:
      - broker
    container_name: sub
    image: philipz/rpi-raspbian-mqtt
    networks:
      - mqtt
    command: qemu-arm-static /bin/sh -c 'mosquitto_sub -h
broker -t /test'
```

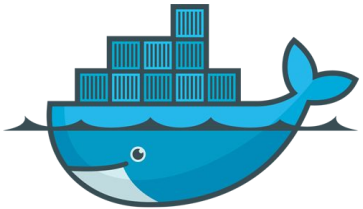


Compose File Sample (3/3)

```
  Pub:
    depends_on:
      - Sub
    container_name: pub
    image: philipz/rpi-raspbian-mqtt
    networks:
      - mqtt
    command: qemu-arm-static /bin/sh -c 'mosquitto_pub -h broker -t
/test -m Hello_World,Philipz!'
networks:
  mqtt:
```



6. Send MQTT to Adafruit IO



RPi CPU Temp

cat /sys/class/thermal/thermal_zone0/temp

docker run -ti --rm -v /sys/class/thermal/thermal_zone0/temp:/sys/class/thermal/thermal_zone0/temp philipz/rpi-raspbian-mqtt bash

https://io.adafruit.com

https://github.com/adafruit/io-client-python

Python on Raspberry Pi

1. $ docker run -ti --rm philipz/rpi-raspbian-mqtt bash
2. $ mosquitto_sub -h 192.168.2.11 -t Home/RPI3/Temp
3. $ docker run -ti --rm -v $(pwd)/Class4_6:/data -v /sys/class/thermal/thermal_zone0/temp:/sys/class/thermal/thermal_zone0/temp python:3.6-slim bash
4. $ pip install adafruit-io
5. $ python measurecputemp.py

Adafruit

Adafruit was founded by MIT engineer, Limor "Ladyada" Fried. Her goal was to create the best place online for learning electronics and making the best designed products for makers of all ages and skill levels.

Connect

You have been invited to use Adafruit IO on Zapier!

ADAFRUIT IO

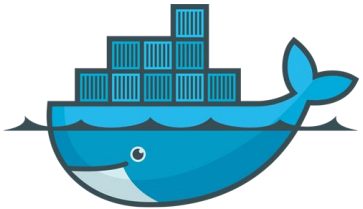
Adafruit IO is a system for logging data from embedded devices. Our focus is on ease of use and enabling simple data connections with little programming required. IO includes client libraries that wrap our REST API, as well as basic support for the MQTT protocol.

YOU WERE INVITED BY: BRENNEN@ADAFRUIT.COM

The Adafruit IO team invites you to test their Zapier integration before it's available for everyone. Neat! Accept the invite and build a Zap with Adafruit IO to get started.

If you know and trust the developers behind this email address, then

7. 結語



Building Docker Image by Onbuild

https://hub.docker.com/_/python/

Support multi-architectures, like amd64, arm32v5, arm32v7, arm64v8, i386, ppc64le, s390x, windows-amd64.

Crontab to run the Docker image by schedule.

*/10 * * * * root docker run -it XXXXX mqtt.py

Play with Docker Classroom

The Play with Docker classroom brings you labs and tutorials that help you get hands-on experience using Docker. In this classroom you will find a mix labs and tutorials that will help Docker users, including SysAdmins, IT Pros, and Developers. There is a mix of hands-on tutorials right in the browser, instructions on setting up and using Docker in your own environment, and resources about best practices for developing and deploying your own applications.

We recommend you start with one of our Getting Started Guides, and then explore the individual labs that explore many advanced features of Docker

Getting Started Guides

For a comprehensive approach to understanding Docker, choose your preferred journey.

Getting Started Walk-through for IT Pros and System Administrators
Learn more about Docker, how it works and how it can help you deploy secure, scalable applications and save money along the way.

Getting Started Walk-through for Developers
Learn the core concepts of Docker and how it can make building apps faster, easier, and more secure.

Or for a full list of individual labs on this site, check out our labs page

Full list of individual labs

Thank you
Docker可省下比金錢更寶貴的時間！
